## **DETAILED ACTION**

### ***Location of Application***

1. The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1655.

### ***Election/Restriction***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, drawn to an integration sequence (claims 1 and 2) and a target nucleic acid sequence (claims 3 and 4), classified in class 536, subclass 23.1.
  - II. Claims 5-7, drawn to a method for selecting a target nucleic acid molecule, classified in class 436, subclass 94.
  - III. Claims 8-11, drawn to a method of determining the sequence of a nucleic acid molecule, classified in class 435, subclass 463.
  - IV. Claims 12, 13, and 29, drawn to a method of making one or more deletions in a nucleic acid molecule, classified in class 436, subclass 94.
  - V. Claims 14-20 and 27, drawn to a method for cloning a nucleic acid molecule or a population of nucleic acid molecules, classified in class 435, subclass 463.
  - VI. Claims 21-26 and 28, drawn to a method of circularizing a linear nucleic acid molecule, classified in class 435, subclass 463.
3. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 1655

Groups I, II, III, VI, V, and VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as the method in Group II or III or IV or V or VI.

Groups II, III, VI, V, and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, these inventions are directed to different methods comprised of different method steps and result in different end products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Brian Del Burno (Reg. No. 42,473) on May 21, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1655

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CAR § 1.6(d)). The CM Fax Center number is either (703) 308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank Lu, Ph.D., whose telephone number is (703) 305-1270. The examiner can normally be reached on Monday-Friday from 9 A.M. to 5 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, W. Gary Jones, can be reached on (703) 308-1152.
